

Financial Regulators & Central Banks

Use our Vizor SupTech platform for better data collection, risk-based supervision, validation and analysis of regulatory and statistical data.

Vizor SupTech Platform

We make it easier for central banks, regulators and supervisory authorities to collect the right data, identify risks and gain insight to make decisions faster in continually changing markets.

Our Vizor SupTech platform automates the full supervisory lifecycle, helping financial regulators to improve data quality to enable more efficient and effective supervision. We support:

- European regulatory frameworks defined by the ECB, EBA and EIOPA
- International regulatory data models, standards and best practices as defined by the BCBS (Basel II, Basel III, Basel IV), IAIS, IOSCO and the IFRS

Why Regnology for financial regulation?

Proven Solution

Purpose-built, enterprise class COTS (commercial off-the-shelf) software solution for financial supervision trusted in more than 30 jurisdictions across the world.

Flexibility and Scalability

No-code and self-service tool enables regulators to implement new regulatory requirements easily and fast.

Industry Expertise

Unmatched subject matter expertise and domain knowledge in regulatory data collection, management and analysis.

Global Community

Join our community of more than 30 central banks and supervisory authorities exchange their knowledge and experience.

Supervise effectively with high-quality data

With our Vizor SupTech platform, financial regulators can collect data and generate assessment reports, including licensing new market participants and managing master data. Once the data is collected, regulators can use it to assess entity risks and prioritise resources on the areas of highest impact but also conduct extensive analysis and use the insights for proactive engagement with the market.

Data collection and licensing

Reduce costs and time of collecting high-quality data with our Vizor SupTech platform. It enables you to automate your full workflow: scheduling, tracking review and assessment. You can collect and validate license application forms and process payments from market participants, easily create and administrate your data collections, review and assess successfully submitted return data.

Risk-based supervision and market oversight

With our Vizor SupTech platform, you can assess and supervise with confidence. Use collected data to assess entity risks and prioritise resources on the areas of highest impact. You can analyse high-quality data to identify systemic risks to the wider economy, receive real-time updates and perform predictive analysis and proactively track and investigate emerging risks.

Analysis, reporting and market insight

Use rich, perfect, granular data you can trust for extensive analysis and proactive engagement with the market. With our Vizor SupTech platform, you can generate assessments and KPI reports instantly, gather market insights and reduce volatility. Through analysis of collected data, you can identify outliers, trends and emerging risks in real-time, and assess key ratios and performance indicators.

Award-winning SupTech platform that clients trust

Our product has been honored by leading analysts and industry-specific reports. The Basel Committee on Banking Supervision quoted our SupTech platform in its consultation paper titled “Implications of fintech developments for banks and bank supervisors”. Throughout the years, we have been recognized as the:

- “Best Data Management Solution for Regulatory Compliance” at Central Banking’s FinTech & RegTech Global Awards.
- “Best Technology for Regulatory Compliance” at Central Banking’s FinTech & RegTech Global Awards.
- “Best RegTech Initiative and Regulator Reporting solution” at Regulation Asia Awards.
- “Global Technology Provider of the year” at Central Banking’s FinTech & RegTech Global Awards, three consecutive years.

In 2022, we have won Central Banking Award in the “Technology Services – Regulatory” category and in the category “Supervisory Technology” in the Chartis RiskTech100® 2022 report. We have also been listed as a “Category leader” in the Chartis Regulatory Reporting 2022 Quadrant report, and one of the most innovative RegTech companies by RegTech Analyst.

Vizor SupTech platform already enables a number of data collections at the Bank. This platform has an advanced toolset that can rapidly adapt to meet future needs.”

Beju Shah, Domain Lead – Data Collection & Publication, The Bank of England

Vizor SupTech platform helped us to manage our prudential data collection and the licensing of financial institutions. Our regulated entities can now upload their data automatically via API, decreasing the amount of human interaction when submitting the data.”

Michael Mensah, Director of ICT, Bank of Ghana

Vizor SupTech platform best met APRA’s need for a modern, efficient and user-friendly data collection system that would adapt as technology evolved. We are confident that the partnership will allow financial companies to report data to APRA more quickly, efficiently and accurately.”

Sean Carmody, Executive Director for the Cross-Industry Insights and Data Division, APRA

About Regnology

Regnology is a leading international provider of innovative regulatory and supervisory technology solutions (RegTech and SupTech), of AEOI and tax reporting products, as well as of services along the Regulatory Value Chain for financial services. Regnology has been a partner for banks and regulators for 25 years. Until the end of 2020, the company was part of BearingPoint group and operated under the name BearingPoint RegTech. Since the sale of the RegTech business to private equity firm Nordic Capital, the company has been independent. In June 2021, the company joined forces with Vizor Software and recently changed its name to Regnology. In total, Regnology serves more than 7,000 financial services firms with reporting solutions. At the same time, the company enables more than 50 regulators and tax authorities on five continents to collect data from 34,000 firms in 60 countries. Regnology has a total workforce of 800 employees at 15 office locations in 9 countries.
